

## Technology

We enhance our customers' real estate experience with world-class services delivered through cutting edge technology.

### Committed to Technology

Intero is committed to being at the forefront of the real estate industry through its use of technology. We are dedicated to ensuring

that we can provide clients and associates with timely and relevant information. And we're enthusiastic about evaluating how we leverage existing tools to improve the service we provide.

### Strategic Partnerships

At Intero, we partner with companies who share our values and our commitment to exceeding expectations. Cisco has helped us integrate Voice Over IP systems that enhance communication and leverage web-based tools by integrating data with day-to-day communications. Our

web development team has produced an interactive website providing consumers access to property data and a simple interface to communicate their real estate needs.

### Online Tools for Buyers and Sellers

Intero provides buyers and sellers with a web-based toolkit that provides more than access to current property information. At [www.InteroRealEstate.com](http://www.InteroRealEstate.com), you'll find demographic data, fact sheets about buying and selling, articles, tips and checklists. We've responded to consumers needs by assembling a suite of tools, in a single location which helps us efficiently execute your real estate transaction.
